diagnosis and also when the patient is discharged from the hospital (Final Diagnosis). In our hospital, MRD technicians in the Medical Records Department have extensively trained (full one-year training at Safdarjung Hospital, New Delhi, hosted by the Ministry of Health and Family Welfare, New Delhi). The hospital has developed an electronic hospital information System in which all discharge diagnoses are entered electronically and the trained MRD technicians enter the ICD 10 codes, a task that they have been doing for two decades. This has minimized the errors and has helped the healthcare professionals to look at and learn from the data related to a spectrum of diseases. This feature of our system has been widely appreciated, countrywide and several hospitals are emulating the same.
